

MARI-4

Mari-4 is the last but certainly not the least in our Mari series. V-shape hull is, what makes Mari-4 different compared to other Mari kayaks. V-shape hull adds initial stability and improves kayak's tracking compared to round hull. Those reasons make Mari-4 suitable kayak for very wide range of paddlers. Despite better stability and tracking, Mari-4 can carry speed through the water very easily, even with a lot of cargo on board. Although Mari-4 is a good kayak to get first paddling experience in, it responds much higher expectations as well.

|----------|--|
| LENGTH | 510 cm (16'9") |
| WIDTH | 57 cm (22") |
| CAPACITY | approx. 135 kg (300 lbs) |
| WEIGHT | 23 kg (50,5 lbs) |
| COCKPIT | 71x38 cm (28x15") |
| STORAGE | Front: 50L, hatch: 24 cm (10") Rear: 80 L, hatch: 44/26 cm (17x10") |

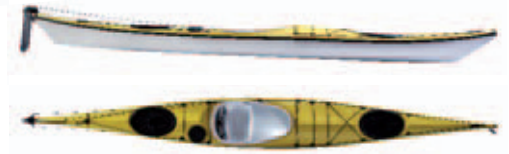

Rudder

MARI-4 LC

This product has exactly the same features as the previous one, but large cockpit and dayhatch are included.

COCKPIT 82x44 cm (32x17")

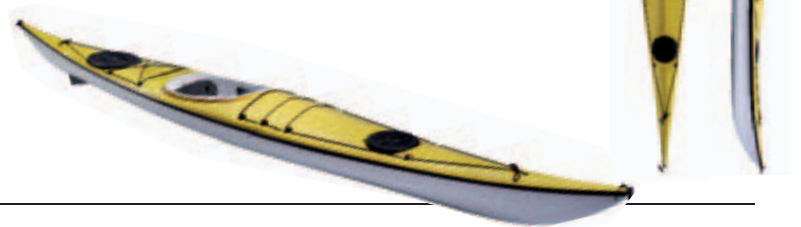

MARI-2

Mari-2 is the elementary sea-kayak without unnecessary "bells and whistles". Its well-trying and trustworthy round hull gives excellent (cruising-) speed to this kayak. Without load on the board, stability of Mari-2 can make beginners a bit nervous. But after getting used to this kayaks and/or putting cargo into storage rooms, stability improves dramatically without reducing speed. Retractable SKEG improves the tracking and also adds stability on bigger waves. Mari-2 has enough dry storage-room to make multi-day cruises, but its size doesn't disturb to use it for only enjoying the sunset in coastal water.

People, who take paddling a bit more seriously, will just love that boat.

MARI-3 EXTRA

Mari-3Extra is the advanced version of Mari-2. No changes made in this fast round hull, which has proven itself to be very good one. But this kayak has a couple of features, Mari-2 doesn't. To make loading-work easier, this kayak has larger, oval hatch in front. And small dry storage-room (day-hatch) just behind of the cockpit is also added. Day-hatch allows quick access to your gear you may need on open water. Having both rudder- and SKEG systems is the reason, what makes Mari-3Extra superb kayak for very different conditions.

As an additional option Mari-3Extra is available also with larger cockpit, with measures of 82x44 cm (32x17")
